Introduction

About me

- I am a dedicated .NET Full Stack Developer with practical experience gained through academic projects, internships, and real-world applications. I specialize in creating responsive and intuitive front-end designs alongside robust and efficient back-end systems. What sets me apart is my ability to consistently deliver projects ahead of deadlines while maintaining high standards of quality, scalability, and maintainability. I focus on writing clean code and applying thoughtful design principles to build solutions that are reliable,

-

Courses

NET Backend Development

This course provided in-depth knowledge of building secure and scalable backend applications using .NET technologies. Covered RESTful API development, database integration with SQL Server, and server-side logic implementation.

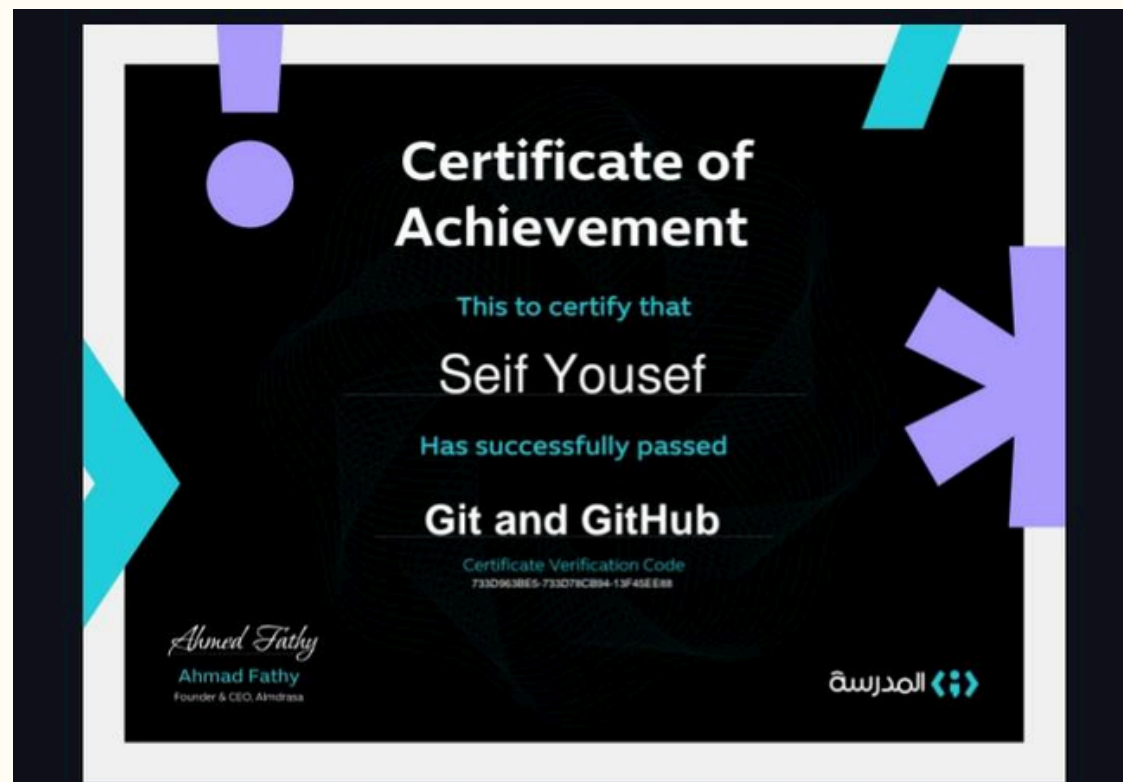

front-End Web Development

Focused on designing and developing responsive, user-friendly web interfaces using HTML, CSS, JavaScript, and modern frameworks. Emphasized building interactive single-page applications and improving user experience.

Certificates

Git & Github

SQL Server

Educational Background

2022 - 2026

in Computer Science – Zagazig University

(Expected Graduation: 2026)

Focused on software development, algorithms, data structures, and system design. Gained strong theoretical foundation alongside practical skills through projects and coursework.

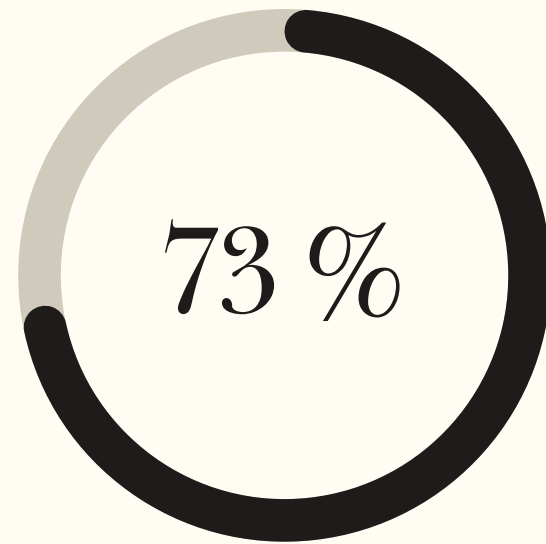

Back-end Development Training (ITI)

2022

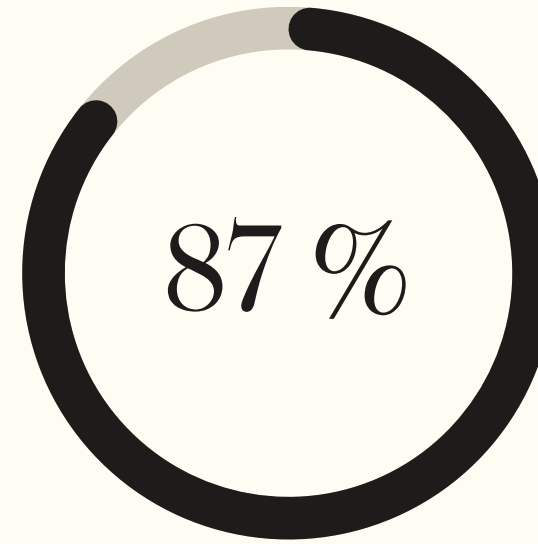

=– Gained practical experience in server-side programming, working with databases, APIs, and backend frameworks to build scalable and secure web applications. Covered technologies such as ASP.NET Core, SQL Server, and RESTful services through hands-on projects.

Personal Skills

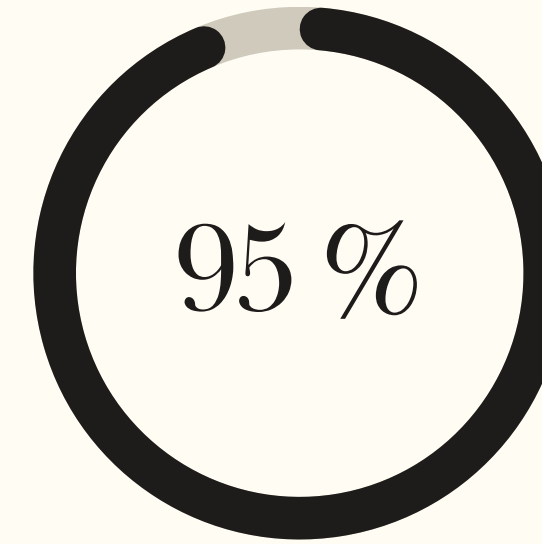

I am committed to continuous self-improvement and bring strong organizational skills, attention to detail, and effective problem-solving abilities to every project. These personal qualities help me deliver high-quality work while collaborating effectively with teams and clients.

Time Management:

Attention to Detail

•
• Problem-Solving:

Skill

Technical Skills

C#, JavaScript, C++, ASP.NET Core, Entity Framework, MVC, API, SQL Server, Git/GitHub

Soft Skills

Problem Solving, Communication, Teamwork, Adaptability, Project Management

Offered Services

Full-Stack Web Development

Build complete web applications using .NET and SQL Server, from front-end to back-end

Database Design & Optimization

Design robust databases and optimize performance for speed and reliability
